NOAA Climate and Global Change Postdoctoral Fellowships

Application deadline: 6 January 2017

Diet and Conservation of the Endangered Tree Snail
Anthony Amend, Alumni Class 20

The UCAR Visiting Scientist Programs announces the 2017 recruitment for NOAA Climate and Global Change Postdoctoral Fellowships (C&GC). The fellowship program has an outstanding reputation for attracting the best and the brightest PhDs in the sciences relevant to the NOAA Climate and Global Change Program. Each appointed fellow is hosted by a mentoring scientist at a U.S. university or research institution to work in an area of mutual interest.

NOAA Climate and Global Change Postdoctoral Fellows focus on observing understanding, modeling, and predicting climate variability and change on seasonal and longer time scales. This includes the documentation and analysis of past, current, or possible future climate variability and change as well as the study of the underlying physical, chemical, and biological processes.

Rebecca Jackson, Class 26

Applications are due 6 January. Appointments will be announced in March 2017.

Preference is given to new graduates who are seeking their first fellowship and who have held a PhD for no more than three years. Awardees must change institutions (unless there are compelling circumstances) and identify a host, who must be at a U.S. institution. A clearly articulated research proposal is particularly important. A steering committee, broadly representing the areas covered by this program, selects the fellows. The selection criteria used by the steering committee in making the awards is available at vsp.ucar.edu/cgc.

Advanced contact with a potential host is required. Interested host scientists are required to submit a brief letter of intent to host the fellow and a curriculum vita. Hosts are expected to mentor the fellow and provide office, computing, laboratory, and field research needs of the fellow as appropriate.

C&GC fellows are UCAR employees and receive a fixed annual salary plus UCAR's benefits (health and dental insurance, paid time off, paid holidays, TIAA retirement fund, and life insurance). Allowances are provided for relocation and scientific travel during the appointment. Some funds may be available to support the cost of publications.

For additional information on this program and instructions on how to apply, please visit: vsp.ucar.edu/cgc. For further information, call (303) 497-1605 or e-mail vspapply@ucar.edu.

Billy D'Andrea, Alumni Class 18

Jessica Tierney, Alumni Class 20

The NOAA Climate Program Office sponsors this program. The University Corporation for Atmospheric Research is an EO/AEE who encourages and values diversity in the workplace.
