

# PUNCH PULSE

A Citizen-Science Pipeline for Heliospheric Imagery

## HOW PULSE WORKS · THEORY OF CHANGE

*The dome session IS citizen-science training. The companion app IS the practice platform.*

*Audiences who participate ARE practicing citizen scientists.*

Chris “Gilly” Gilbert (PI, NWRA) · Cherilynn Morrow (Outreach Co-I, SwRI)  
Sarah Kovac (Co-I, UCAR/HAO) · Sanlyn Buxner (External Evaluator, PSI)  
James Negus (Education Consultant, CSU)

# Three things *you* can do.

01

**This is your citizen-science workforce. Help us aim it.**

Feature ID, event cataloging, morphology classification — what's the question in your science worth crowdsourcing?

02

**Introduce us to one planetarium educator.**

Each intro is a candidate for the next workshop cohort. Directors, museum educators, regional society members — whoever's in your network.

03

**Get on the project newsletter.**

Quarterly updates on workshops, workflow design, and when “Space Weather This Week” goes live.

**Find me at the poster session after this.**
